Electric Motor Monitor

Keeping a watchful eye on electric motor temperature
Application Electric Motor Monitor

Keeping a Watchful Eye on Electric Motor Temperature

**Industry:** Manufacturing

**Product:** AT-7000, Motor Monitor

**Parameters measured:** Temperature

When Flanders Electric Motor Service provided drop-in replacement motors for a high-speed single-stand cold mill at Logan Aluminum, one of the key goals, in addition to increased production, was high reliability. A high percentage of all the aluminum beverage can stock used in the United States is processed by the Logan cold mill, and any down time has a significant impact on the output and profitability of the mill's owners.

As a result, when Flanders built the new motors for the Logan mill, they made sure to include an Accumetrics Motor Monitor to constantly monitor the temperature of the armature. By continuously monitoring the internal temperature of the motors, the motors can run at a safe but full rating. Additionally, the mill operators can shut down the mill before a rise in temperature causes damage that would require an expensive and time-consuming rebuild.

The Motor Monitor can also be configured to measure rotor voltages and currents, detect ground faults, and monitor shaft torque and torsional vibration. The Motor Monitor is a variation of the AT-7000 product line.
What are divisions of PCB Piezotronics?
PCB Piezotronics, a member of the PCB Group families of companies, has five major divisions, all of which offer targeted sensor technologies. These divisions are supported by an active outside direct sales force of Field Application Engineers, as well as international direct sales offices throughout the world. Individual PCB Piezotronics divisions, locations and their primary product specialties include:

Depew, NY, USA - www.pcb.com - Piezoelectric, ICP®, piezoresistive & capacitive pressure, acoustic, force, torque, load, strain, shock & vibration sensors.

Depew, NY, USA - www.imi-sensors.com - Industrial vibration sensors, bearing fault detectors, mechanical vibration switches, panel meters, cables & accessories for predictive maintenance and equipment protection. Also providing pressure sensors and accelerometers for precision measurement requirements in the power generation and energy industries.

Farmington Hills, MI & Depew, NY, USA - www.pcb.com/auto - Sensors & Instrumentation for automotive testing, including modal analysis; NVH; component durability; powertrain testing; vehicle dynamics; safety and regulatory testing.

Depew, NY, USA - www.imi-sensors.com - Industrial vibration sensors, bearing fault detectors, mechanical vibration switches, panel meters, cables & accessories for predictive maintenance and equipment protection. Also providing pressure sensors and accelerometers for precision measurement requirements in the power generation and energy industries.

Farmington Hills, MI & Provo, UT, USA - www.larsondavis.com - Precision microphones, sound level meters, noise dosimeters, audiometric calibration systems.
