

Truck Wheel Instrumentation

Monitor over-the-road truck wheels in real time

Application Truck Wheel Instrumentation

Monitoring Over-the-Road Truck Wheels in Real Time

Industry: Transportation

Product: [AT-7000](#) (88 channels total)

Parameters measured: Heat (24 channels), strain (64 channels)

Accuride Corporation is the premier manufacturer of steel and aluminum wheels for vehicles ranging from pickup trucks to class 8 tractor-trailers. The company runs an aggressive research and development program to assure the safety and quality of its products, and it wanted to measure strain and temperature in real time as its wheels traveled over the road on test trucks.

To overcome the limitations of both slip rings and directly-attached data collection devices, Accuride uses an AT-7000 Digital Rotor Telemetry System from Accumetrics Associates, Inc. This modular system consists of a small cylindrical assembly 171mm (6.75") in diameter by 155mm (6.12") long that is supported by a steel bracket at the wheel hub. This assembly contains sealed electronic modules that acquire data from 88 sensor channels. All sensor data is amplified, multiplexed and digitized into a single high speed data stream for transmission off the rotating wheel.

In the past, strain was often measured statically in a laboratory at very slow rotational speeds, and repeated tests were required to gather all the necessary data. A complete static test could take more than an hour to complete. Now, with digital telemetry, a dynamic test can be run and all the data gathered in less than a minute.

The digital telemetry system permits collecting strain data while traveling over the roads. In addition, the problem of different wheel rotation positions on multiple runs is eliminated. Data can be collected dynamically for longer periods of time, and the test engineer can sit in the cab of the truck and watch the data on a laptop computer as it is being generated.

The bottom line is that digital rotor telemetry makes data collection off rotating wheels faster, easier and safer while helping Accuride Corporation to meet its research and quality assurance goals.

What are divisions of PCB Piezotronics?

PCB Piezotronics, a member of the PCB Group families of companies, has five major divisions, all of which offer targeted sensor technologies. These divisions are supported by an active outside direct sales force of Field Application Engineers, as well as international direct sales offices throughout the world. Individual PCB Piezotronics divisions, locations and their primary product specialties include:

 **PCB PIEZOTRONICS**^{INC.}

Depew, NY, USA - www.pcb.com – Piezoelectric, ICP®, piezoresistive & capacitive pressure, acoustic, force, torque, load, strain, shock & vibration sensors.

 **AEROSPACE & DEFENSE**
A PCB PIEZOTRONICS DIV.

Depew, NY, USA - www.pcb.com/aerospace – Sensors & Instrumentation for aerospace & defense applications, including air and spacecraft testing.

 **AUTOMOTIVE SENSORS**
A PCB PIEZOTRONICS DIV.

Novi, MI, USA - www.pcb.com/auto – Sensors & Instrumentation for automotive testing, including modal analysis; NVH; component durability; powertrain testing; vehicle dynamics; safety and regulatory testing.

 **IMI SENSORS**
A PCB PIEZOTRONICS DIV.

Depew, NY, USA - www.imi-sensors.com – Industrial vibration sensors, bearing fault detectors, mechanical vibration switches, panel meters, cables & accessories for predictive maintenance and equipment protection.

 **LARSON DAVIS**
A PCB PIEZOTRONICS DIV.

Depew, NY & Provo, UT, USA www.larsondavis.com – Precision microphones, sound level meters, noise dosimeters, audiometric calibration systems.

 **PCB PIEZOTRONICS**^{INC.}
MEMS ADVANCED DESIGN CENTER

San Clemente, CA, USA - www.pcb.com – Research & development engineering center for special technologies.

Seattle, WA, USA - www.pcb.com – Process development and fabrication of MEMS sensors.

 **PCB LOAD & TORQUE**
A PCB PIEZOTRONICS DIV.

Farmington Hills, MI, USA - www.pcb.com/LoadAndTorque – Designs and manufactures high quality, precision load cells, wheel force transducers, torque transducers, telemetry systems, and fastener torque-tension test systems.

PCB® Group Companies:

 **TMS DYNAMIC METROLOGY**
A PCB GROUP COMPANY

Cincinnati, OH, USA - www.modalshop.com – Global leader in dynamic calibration offering a complete line of automated calibration systems and recalibration services to support dynamic vibration, pressure and force sensors in applications such as: national standards, commercial labs, government/military research, consultancies, and industrial/plant floor operations.

Rochester, NY, USA - www.sti-tech.com – Mechanical engineering consulting firm specializing infinite element analysis, advance analytical techniques, experimentation, technology development, & design optimization for turbo machinery, industrial machine systems & mechanical structures.

 **ACCUMETRICS**^{INC.}
A PCB GROUP COMPANY

6 British American Boulevard Suite 103-F, Latham, NY 12110 USA
Phone 518-393-2200 ■ Fax 716-684-0987 ■ Email telemetry@pcb.com
